  - Radio conferences on environments

### **Programs outline:**

#### **1 - Culture of Peace**

Campaign to bring people from a culture of war to a culture of Peace. This is to respect all life, reject violence, share with others, listen to understand, preserve the planet and

rediscover solidarity.

## **2 - Fight against AIDS**

we plan for a campaign in all the 5 regions of Togo. Young people will be formed to educate others. It is a special program where there will be meetings in schools, universities and soon.

## **3 - Environmental Health**

People should be educated to change their environmentally destructive behavior. Any industrial process or exploration which poses health risks to workers, surrounding communities or the ecosystem, must be opposed. The basic health services and education must be provided for all.

## **4 - Renewable Energy**

It is a current project which aimed to popularize the use of solar energies for electricity and for cooking.

This is to provide the sustainable energy education and training at every opportunity level. They will be used to educate people on the various impacts of the non-rechargeable batteries.

## **5 - ICT Training.**

The Technology for Information and Communication training program is planned to marginalized groups or people. Its main objective is to create awareness at level of internet people, so to benefit the young should be trained to form others.

## **6 – International Camp**

This program shall gather young people from different cultures and continents for the socio-cultural activities exchange activities, awareness of AIDS and so on.

It shall be taking place in the vacation 2008, the period July-August.

## **7 - Private initiative**

In Togo, people do not take private initiatives, they use to wait for the government for employment.

So the young should be educated and formed about private initiatives by the way they will be able to create jobs their own.
